The touchscreen experience platform for modern exam rooms

Patient education. Provider tools. Room readiness. One platform.

Turn every specialty clinic exam room into a more useful, engaging, and coordinated care environment.

Patient education • Care workflow • AI assistance • Translation • Documents • Room engagement

Built for specialty clinics and multi-location ambulatory groups.

THE EXAM ROOM IS CHANGING.

Specialty clinics are adding more screens, devices, digital content, patient education tools, ambient AI, translation workflows, and provider-support technologies. Without a coordinated experience layer, the room can become fragmented.

COMMON CHALLENGES

-  Passive patient waiting
-  Providers repeating the same explanations
-  Education, forms, and videos spread across systems
-  Difficulty standardizing the room experience across locations
-  Need for modern tools without replacing the EHR

LuminaTouch provides the clinic-controlled layer that brings patients, providers, displays, devices, documents, and room workflows together.

WHAT IS LUMINATOUGH?

A touchscreen experience platform for specialty clinic rooms

LuminaTouch turns exam room touchscreens into interactive hubs for patient education, care workflow, provider support, AI assistance, documents, translation-ready flows, and room engagement.

LUMINATOUGH HELPS CLINICS:

- ✓ Use wait time more productively
- ✓ Support better patient understanding
- ✓ Give providers visual tools during the care conversation
- ✓ Standardize approved education across rooms and locations
- ✓ Keep forms, instructions, videos, and resources accessible in the room
- ✓ Prepare for AI-assisted workflows without replacing the EHR

ONE PLATFORM. FOUR LAYERS OF VALUE.

1 PATIENT LAYER

- Care paths and visit guidance
- Patient education, forms, and documents
- Relaxation, accessibility prompts, and QR handoffs

2 PROVIDER LAYER

- Provider cast and screen sharing
- 3D anatomy and visual education
- AI-ready scribe demos and visit-prep concepts

3 ROOM LAYER

- Kiosk modes and idle states
- Device readiness and support prompts
- Workflow handoffs and room coordination

4 ADMIN LAYER

- Content management and clinic branding
- Device health and fleet visibility
- Reporting, audit trails, backups, and location-level control

Built for healthcare. Secure. Compliant. Scalable.

WHY SPECIALTY CLINICS NEED IT

Specialty clinics are education-heavy environments. Patients often need to understand procedures, conditions, risks, preparation instructions, next steps, and follow-up plans. LuminaTouch is designed for repeatable visits where education, documents, and provider explanation matter.

PRACTICAL BENEFITS

- 🧠 Better patient comprehension
- 🕒 Reduced perceived wait time
- 👥 More efficient provider communication
- 🛡️ More consistent care experiences
- ★ More modern patient experience
- 📊 More scalable operations
- 🚀 Future-ready room design

ROI AREAS TO MEASURE

- Patient comprehension
- Patient satisfaction
- Reduced perceived wait time
- Room-to-room consistency
- Provider explanation time
- Provider satisfaction
- Documentation friction
- Location-level adoption

Women's Health • Orthopedics • Cardiology • GI • Dermatology • Primary Care • Dental • Pediatrics

LuminaTouch complements the EHR by coordinating the in-room experience.
